

Generiamo vere ombre...

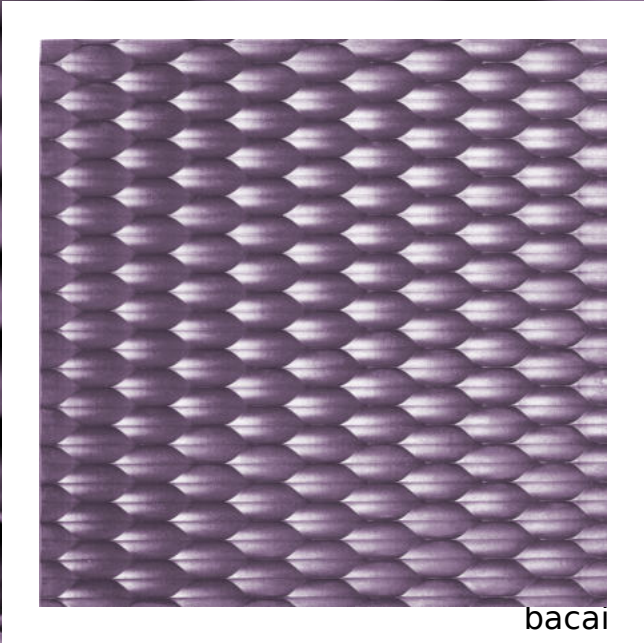

La ricerca di prodotti esclusivi ci ha portato a proporre pannelli tridimensionali fin dal 1999.

Nel corso degli anni abbiamo acquisito un'esperienza unica nel settore. Ci siamo evoluti e specializzati creando e utilizzando software e tecnologie per dare il meglio nel campo delle decorazioni d'ambiente.

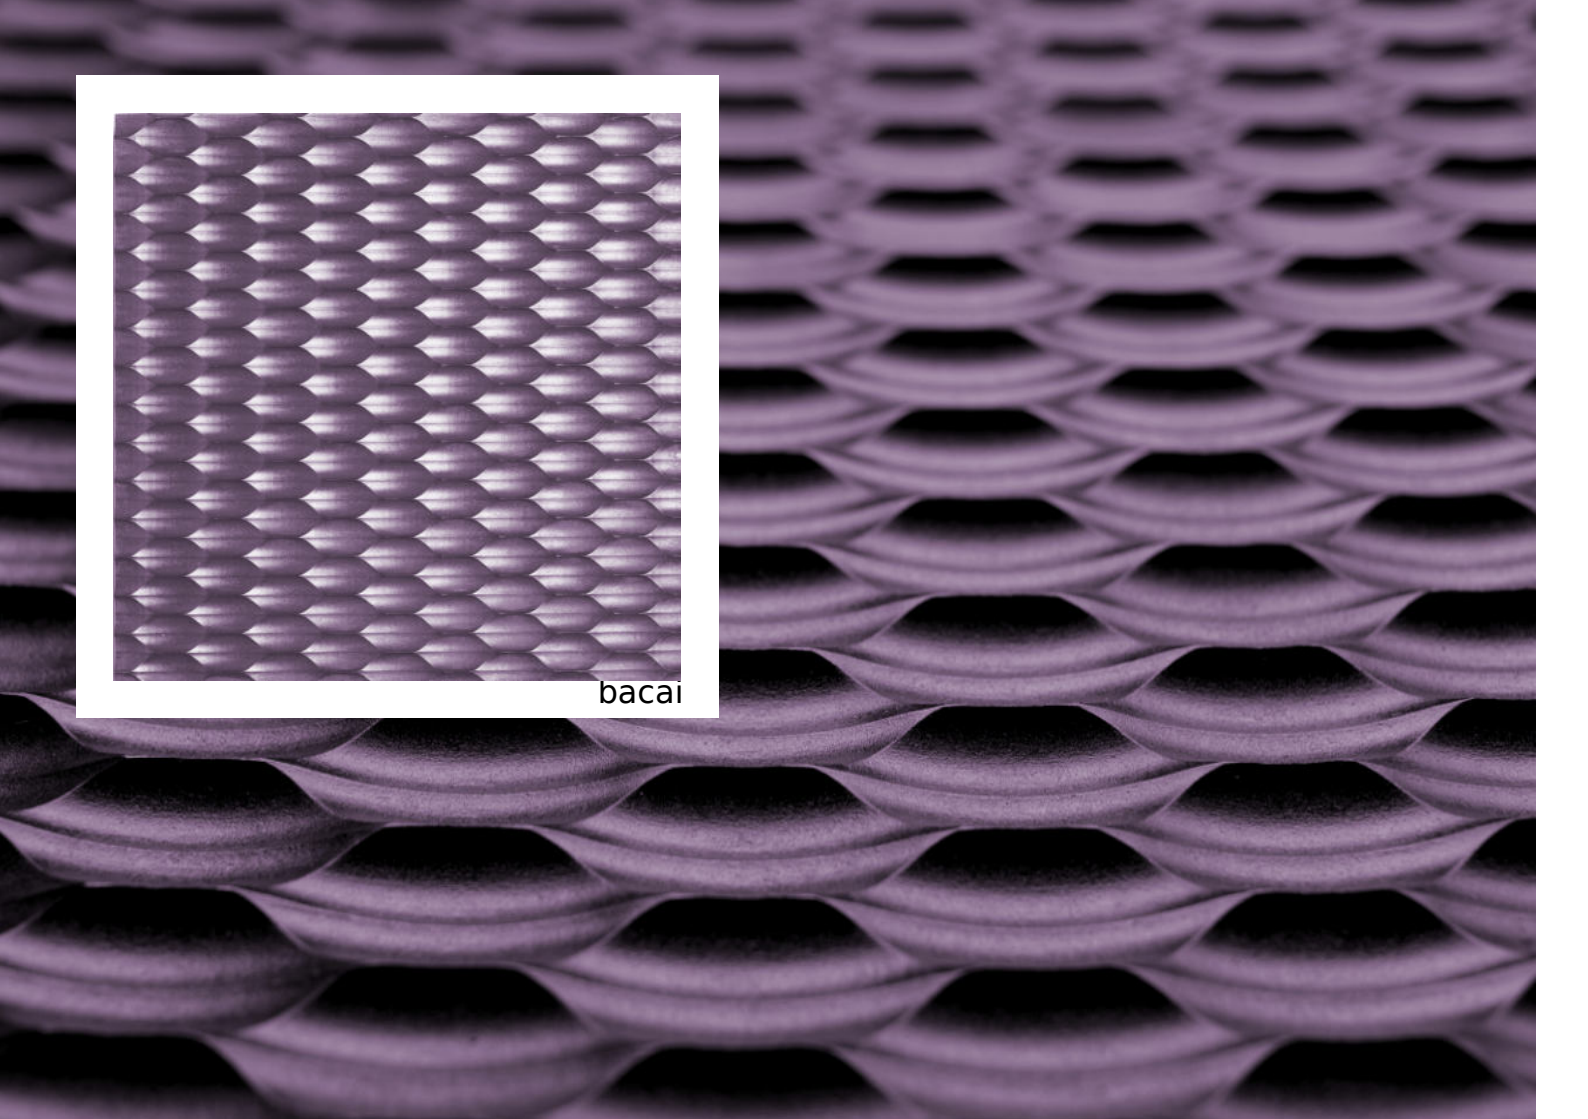

Così come deve essere, la nostra ricerca non ha confini ed è continuamente stimolata dalle richieste e dall'attenzione al cliente.

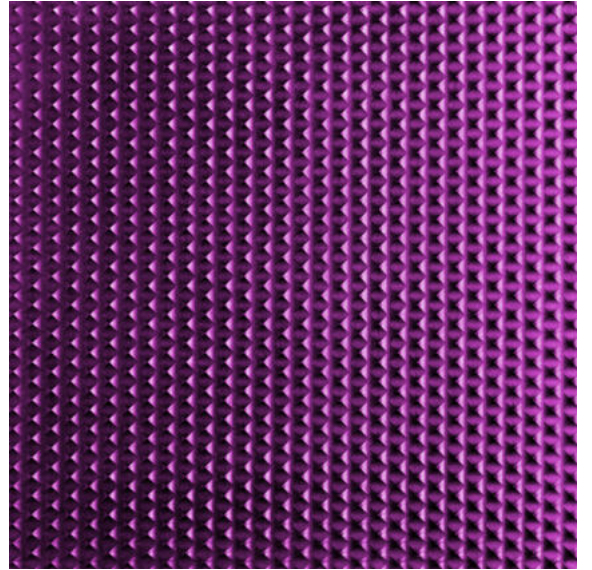

Produciamo pannelli decorativi in Mdf o in essenze lignee

Progetti speciali Possiamo sviluppare il modello tridimensionale, la definizione dei tagli di giunzione e la preparazione del campione da presentare al cliente partendo da una semplice idea, un tracciato 2D o un'immagine.

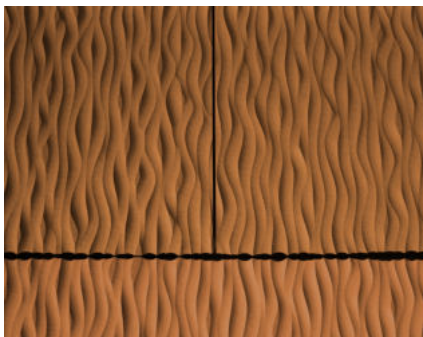

Il ciclo di lavorazione di questa parete da mansarda è così suddiviso: progettazione texture, programmazione e lavorazione con centro di lavoro, installazione provvisoria in laboratorio per verificare le dimensioni e la continuità della texture, imballo e spedizione

La pannellatura crea effetti scenici ed isolamento acustico.

Per esigenze particolari ed architettoniche può essere lasciata un'intercapedine per l'impiantistica ed i pannelli possono essere rimossi agevolmente per l'ispezione.

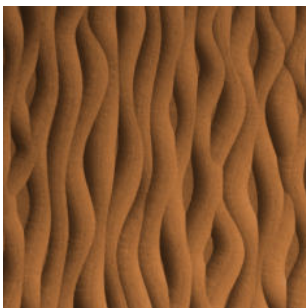

Il montaggio si ottiene fissando i pannelli a parete: con viti e tasselli o colla, con cremagliere in alluminio e clips, con guide orizzontali o verticali da arredamento.

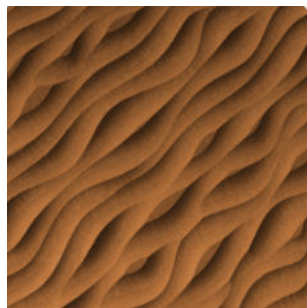

La misura max è 370 x 135cm

Misure più grandi sono realizzabili giuntando più pezzi tra loro; in questo caso la fornitura avviene con uno schema di montaggio dei pannelli identificati e numerati.

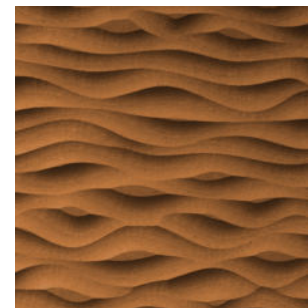

Le texture possono essere modulari ripetitive o progettate senza ripetizione di multiplo.
